

# Safety Alert

## Hazard Alert: Venting of Tyres

Under certain circumstances bubbles may appear in the bead, sidewall, or shoulder area of a tyre. These bubbles are usually gas filled and are due to some form of separation and subsequent air migration from the air chamber into that area of the tyre.

Because of the potential for rapid and uncontrolled bursting of the tyre if incorrectly vented, NON Tyre Manufacturer trained people should not conduct such tyre venting, assist in the venting process, or allow personnel under their control or supervision to perform tyre venting.

If tyre venting is to be conducted by a third party (e.g. a Tyre Manufacturer Employee) it will be performed solely at his or her own risk.

**WARNING:** All other than the Tyre Manufacturer trained personnel must maintain a minimum distance of 50 m, and have Eye & Ear PPE in place while the trained Tyre Manufactures Technical Staff carry out any such tyre venting
